

Achieve lasting identity and access management success.

Identity and Access Management (IAM) Strategy Engagement

Many organizations struggle with manual processes to manage user identities. Tracking and managing identities throughout their lifecycle can be stressful and isn't always transparent. This presents a great risk because attackers utilize these unmanaged identities to escalate privileges. Even if an organization has implemented tools to address these inefficiencies, the toolset may not align with overall security policies or business strategy, or the organization may only be utilizing a small feature set of the tool. CDW's IAM Strategy Engagement addresses these issues by defining the organization's current state maturity and providing recommendations, a roadmap, business justifications and pricing to bring the organization's maturity to the next level.

Identity and Access Management Strategy Engagement can help you achieve:

Operational Efficiencies

Cost Reduction

Reduced Risk

Finding the Right Solution

CDW's IAM Strategy Engagement provides organizations with a structured approach to assessing, optimizing and future-proofing their identity and access management strategy. Our team of seasoned strategists and architects leverage industry standards like NIST, CIS, SOX, PCI DSS and HIPAA to ensure compliance and security best practices.

How it works:

- **Review and Analysis:** We evaluate your current IAM processes, workflows and technology stack, identifying gaps and inefficiencies.
- **Best Practice Review and Recommendations:** By comparing against industry best practices, we outline key risks, inefficiencies and maturity gaps with a clear plan for improvement.
- **Actionable Roadmap:** We deliver an actionable, long-term IAM program roadmap with tactical recommendations, business justification and anticipated remediation costs.
- **Technology Optimization:** Our architects recommend strategies for enhancing existing IAM tools or implementing new solutions that align with your business goals.

Outcome: A clear, actionable IAM strategy that drives security, efficiency and scalable growth for your organization.

CDW + IDENTITY

CDW is a leading provider of Identity and Access Management solutions for organizations of all types.

- **IAM as a Core Competency:** With more than 15 years of focus on IAM, CDW is a market leader in modernizing, streamlining and automating enterprise identity programs.
- **Built Compliant by Design:** CDW strategists are highly knowledgeable in various compliance requirements and industry standards, including NIST, CIS, SOX, GLBA, PCI DSS, HIPAA, CCPA, GDPR, ISACA's ITAF, COBIT 5, ISO 27001/27002 and ITIL v3.
- **Focus on the Future:** Organizations who undertake an IAM Strategy Engagement have greater rates of long-term IAM success than organizations who go direct to deployment.
- **Full Lifecycle Support:** From new program design to management of existing programs, CDW has the experts and services to support every identity program, regardless of its size or maturity.
- **The Right Partnerships:** CDW has committed and longstanding partnerships with most major vendors in the access management, identity governance and privileged access sectors.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Services Overview

The IAM Strategy Engagement covers all three pillars of IAM: Identity Governance and Administration (IGA), Access Management (AM) and Privileged Access Management (PAM). Each pillar covers a focus area that IAM strategists and architects will cover during the engagement. The scope of the engagement can be reduced for customers who don't need an all-inclusive review.

Pillar	Activity	Included
IGA	User Lifecycle Management	✓
	Access Certifications	✓
	SOD Policies	✓
	Role-Based Access Control (RBAC)	✓
	Identity Data Management	✓
	Active Directory Data Management	✓
AM	Single Sign-On	✓
	Multi-Factor Authentication (MFA)	✓
	Workforce Password Management	✓
PAM	Privileged Credential Vaulting	✓
	Secret Sharing	✓
	Privileged Session Management	✓
	Password Rotation	✓
	Third-Party Remote Access Controls	✓
	Endpoint Privileged Account Management	✓
