

WE GET HOW TO THINK LIKE THE ENEMY.

CDW Amplified™ Information Security Red Teaming Services

Your Blue Team is mature and has been preparing; how do you know they are truly ready to defend your organization? CDW's Red Teaming Services help your:

- Blue Team prepare for real-world incidents by verifying whether they can detect quickly and respond properly to threats before the next incident occurs.
- IT team identify gaps that require further investment in people, processes and tools.

CDW's Red Teaming Services can help you achieve:

Reliability

Reduced
Risk

Operational
Efficiencies

Orchestrating the Right Solution

The best way to know if your Blue Team is indeed prepared to protect your most critical assets is to run a realistic attack scenario within your organization. CDW's Red Teaming Services provide you with an independent third-party evaluation from an attacker's point of view.

Over the course of several weeks, at least one CDW Red Teamer will simulate real-world covert cybersecurity attacks against your organization with the primary goal of gaining undetected access to your network from the internet and, if detected, continue to act as an adversary to evaluate your response capabilities. You may also customize the engagement for your specific goals or areas.

After the exercise is complete, CDW will:

1. Review the attack scenario(s) and discuss findings.
2. Provide a written report outlining the attacks performed, access gained (or not gained), and a prioritized list of action items for correcting any security weaknesses discovered.
3. Provide an interactive forum to walk through the exercise from start to finish and answer questions.

CDW GETS INFORMATION SECURITY

We get every organization has its own unique challenges. Our team has conducted more than 5,000 engagements across all verticals, helping clients of all sizes, each with their own needs. Additionally, CDW is:

Able to identify the ideal solution

We maintain an ethical distance between assessment and sales functions, performing independent validation of your security posture and focusing on identifying needs and fixes rather than pushing specific products or services.

Trusted and professional

CDW's security services professionals have a range of expertise in many technical disciplines and products. Many of our engineers have more than a decade of individual experience in military, government and private-sector work.

Stable, reliable and mature

Our team has operated continuously since its inception in 1998 and follows the processes and procedures of a mature consulting organization. We use tools and methodologies that align with industry standards, such as:

- MITRE ATT&CK
- NIST CSF

CDW's full lifecycle of Services can support your business no matter where you are on your journey
